**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-22, drawn to a first subcombination nozzle device.

Group II, claim(s) 23-25, drawn to a first combination sanitary washing apparatus and nozzle.

Group III, claim(s) 26-30, drawn to a second subcombination nozzle device.

Group IV, claim(s) 31-33, drawn to a second combination sanitary washing apparatus and nozzle.

Group V, claim(s) 34-46, drawn to a third combination sanitary washing apparatus and nozzle.

2. The inventions listed as Groups 1-5 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I and II share the technical feature of a nozzle comprising, a spray hole, a pipe, a cover member, and a space between the pipe and cover member. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 4,136,407 to Maurer who shows a nozzle comprising a spray hole

37,a pipe 22, a cover member 14/15, and a space 20 between the pipe 22 and cover member 14/15.

Groups I and III share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups I and IV share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups I and V share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups II and III share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups II and IV share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups II and V share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

Groups III and IV share the technical feature of a nozzle comprising, a spray hole, and a cleaning member. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180, and a cleaning member 12.

Groups IV and V share the technical feature of a nozzle comprising, a spray hole. However, this technical feature is not a special technical feature because it does not define a contribution over the prior art, as evidenced by U.S. Patent No. 5,813,060 to Klopocinski who shows a nozzle 158 comprising a spray hole 180.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
